Comment: Whether this office is the head office in the Russian Zone of Germany, or the Russian Administration itself is not stated in the report.)

HARBOR DREDGING

5. Serious silting conditions in all eastern ports and port approaches requires the procurement of the following equipment from the western zones:
  - a. Dredge "Nogat" from Lübeck on 15 July 1947 (Sailing order still missing).
  - b. Dredge "Seegatt" is to enter the Russian Zone on or about 15 August 1947.
  - c. Cleaner (Spiller) "Himmersatt" which is probably not available since it needs major repairs.
6. The following German equipment has been identified as now operating in the Russian Zone:
  - a. Wismar - Dredge "Achilles" (Halzmann A.G., Berlin)
  - Dredge "Hiddensee" (Water Division, Rostock)
  - b. Rostock and Warnemünde - Dredge "Usedom"
  - c. Stralsund - Dredge "Rügen"
  - d. Sassnitz - Dredge "Hai"
7. In order to complete the dredging of harbors in general, and particularly to clean the port of Wismar to a depth of 7.5 meters, the Russians intend to use a Russian dredging unit in place of the lacking German equipment. Negotiations are under way with Captain Naufov and Lt. Colonel Grebennikov. The Russian unit is to consist of one Dutch built dredge with a capacity of 600 cubic meters per hour, and supporting self-propelled barges which were built in Hamburg. The barges have a listed tonnage of about 500 tons. The unit will consist of about 210 men in all, forty of whom are to be Russians. These will include the Chief of Dredging Operations, three assistants, a machinist and three helpers, tug captains, barge captains, and mechanics. The remainder of the unit is to be composed of German labor assigned by the German administration. Once taken into the unit, they are to be treated as Russian personnel.

NAVAL INFORMATION REQUIRED BY RUSSIANS

8. Captains Taran and Alexeyev have given written orders that the following information be procured:
  - a. Large-scale maps of the Kaiser-Wilhelm Canal, with complete descriptions and ground level sketches of the locks and machinery.
  - b. Navigation maps for the Frelleborg District, as well as for Copenhagen and Falsterbo, and all charts dealing with currents off the Danish and Swedish coasts in the Baltic.
  - c. Exact descriptions of all harbors in the western zones, including approaches and cargo transfer facilities.
9. The latest possible date for the acquisition of this material was 31 July 1947. A survey engineer named Dobritz was specially briefed to visit the Hamburg
